DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 and 15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

2. As for claim 1, the prior art does not teach or fairly suggest the use of a method of capturing a sequence of images having a first and second path for directing the full resolution unprocessed image signals, the first path records the full resolution unprocessed image signals, then performing a post-production process on the recorded image signal, and the second path is directed to sub-sample, in real time, the full resolution unprocessed image signals, applying an image processing algorithm to the sub-sampled image signal, and displaying the modified image signal.
3. As for claim 10, the prior art does not teach or fairly suggest the use of a method of capturing a sequence of images having a first and second path for directing the full resolution unprocessed image signals, the first path records the full resolution unprocessed image signals, then performing a post-production process on the recorded image signal, and the second path is directed to sub-sample, in real time, the full resolution unprocessed image signals, applying an image processing algorithm to the sub-sampled image signal, and displaying the modified image signal.
4. As for claim 11, the prior art does not teach or fairly suggest the use of an image processing apparatus that supplies a sub sampled image to an image processing device to apply an image processing algorithm, simulating a particular look, and based

on this algorithm, contemporaneously applying the algorithm to a full resolution image signal to simulate the particular look.

5. As for claim 15, the prior art does not teach or fairly suggest the use of a method of capturing a sequence of images having a first and second path for directing the full resolution unprocessed image signals, the first path performs a post-production process on the image signal based on the algorithm used on the second path, and the second path is directed to, in real time, simulate a particular look by using an image processing algorithm on the full resolution image signals, and displaying the modified image signal.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chriss S. Yoder, III whose telephone number is (571) 272-7323. The examiner can normally be reached on M-F: 8 - 4:30.
